

**It is my pleasure to recommend Susanne Kobel.**

She has completed two levels of certification - as a Tellington TTouch Practitioner for Companion Animals and as a Practitioner of Tellington TTouch for Human Healthcare. Each of these trainings are three year long. I have worked with Susanne closely in Switzerland, Germany, Austria and Hawaii over the past thirteen years. She has been very helpful to me personally with supportive healthcare counseling and treatment. And in March of 2013 she demonstrated her outstanding skill with dogs when she assisted me at the renowned animal sanctuary, Gut Aiderbichl in Henndorf, Austria. There she did brilliant work as together we demonstrated the calming effects of Tellington TTouch with two very frightened feral dogs recently arrived from Hawaii. Her extensive holistic training in animal and human health care, combined with her quiet and professional approach, gives a feeling of trust to people as well as to their animals.
